

## modulBOX

Solution for integrating smartGAS diffusion sensors into customized enclosures

- Easy assembling in customer housings
- Made for mid and small series
- Optimized gas circulation
- IP54
- Short response time
- Gas proofed fitting
- Calibration adapter with optimized gas feeding as accessory available
- Can be combined with every smartMODUL<sup>BASIC</sup> or smartMODUL<sup>CONNECT</sup> sensor

With the new modulBOX smartGAS offers a simple solution for integrating the smartMODUL<sup>BASIC</sup> and smartMODUL<sup>CONNECT</sup> series sensors into almost every customer enclosure.

It fulfills the requirements for IP protection class 54 and shelters against splash water and entering dust. So the sensors are perfectly protected against environmental influences but are diffusion open connected with the ambience for a fast gas exchange at the same time.
