

Surge Protection Tester

The Novaris SPT Series allows surge protection installers and maintainers to monitor* and diagnose surge protection equipment on site. The SPT-02 uses an auto-range function to accurately determine the clamping voltage of voltage limiting products and the firing voltage of voltage switching products. The SPT-02 is also a multifunction device that supports insulation resistance, continuity, voltage and diode testing. Test results are displayed on a 2 x 16 character display.
